Fruit and Ornamental Trees

Evergreens, Shrubs
and Small Fruits

DUCHESS PEAR

FALLS CITY NURSERY
FALLS CITY, NEBRASKA

THE FALLS CITY NURSERY

Falls City, Nebraska.

Delivered at purchaser's railroad station, freight and express charges paid.

This list cancels all previous quotations.

You will find our stock well selected, carefully dug, and first class with respect to grades and ages. We guarantee to deliver it in good condition.

Our Replace Guarantee—Stock that dies the first year will be replaced at one-half the list price. Freight or express charges will be paid to purchaser's railroad station.

Terms—Cash when stock is delivered.

Time of Delivery—In the spring during March, April and May, and in the fall during October and November.

We will accept orders of 6 at the 12 rate; 50 at the 100 rate; and 500 at the 1000 rate. When the 1000 rate is not given, to find that rate, deduct 10% from the 100 rate.

At prices quoted herein, we cannot afford to fill orders for less than \$2.00.

As to Our Responsibility, Ask the Falls City
State Bank

State Entomologist's Certificate of Nursery Inspection Accompanies Every Shipment.

Carefully Prepared Suggestions for the Planting and
Caring for Trees, Shrubs, and Plants will be
Sent to Each Person Ordering Nursery
Stock

PLEASE READ

A Few Thoughts Worth Considering

"Quality is remembered a long time after the price is forgotten." Buy trees of quality—Good Trees. There is just as much difference in trees as there is in calves or pigs or colts. It pays to keep only those that have been bred right. It pays in the case of buying trees to get the best bred even if you are required to pay a little more. You want trees that are bred right.

Good tops and good roots do not count for every thing. That little tree must have quality. The scion or bud must have been taken from the very best bearing tree of the variety that you wish to grow. The root, or stock, must be properly grown and selected; and, with all this, the grafting or budding must be done under favorable weather and soil conditions in order to bring about the perfect trees that you need to start with in setting out the orchard.

Good trees mean success. Poor trees may grow and produce shade but not much fruit. The properly grafted or budded tree—one that has been made with quality in mind—will grow and bear an abundance of fruit.

THE FALLS CITY NURSERY

Falls City, Nebraska.

Some trees are sold cheaper than others simply because they have not cost so much in time, labor, and careful selection of stock. They are put together in the cheapest possible way, and no particular attention paid to selection, or breeding. Quality trees cost a little more because of the extra painstaking way of growing them. The carefully grown tree is worth many times the price of one carelessly grown. While the trees are small, the average man may see but very little difference between trees of quality and the ordinary tree. To the man who knows trees there is a great difference. To him the trees of quality means success and the scrub trees mean failure.

All would like to be successful in the growing of fruit; but there is one thing that is absolutely necessary to start with, and that is one must buy good trees—trees of quality, or no matter what else you may do all will be failure. We offer you trees of quality that are grown within the fruit belt. If you wish cows for the dairy, you go to a dairy section to buy. If you wish a good hog for breeding purposes, you go to the man who has been making careful selections of the type, or breed, that you wish. Use the same good judgment in the buying of your trees. Go to the fruit section. Go to the man who makes careful selections. Don't buy a scrub at any price; buy a thorough-bred, a tree of quality.

The saving of expense at first by buying scrub trees, by having orchard land poorly prepared, by giving the trees a cheap setting out, by allowing them to go with poor cultivation, and by neglecting to prune and to spray, is not the road to success in the orchard business. But do just the opposite and there is but one branch of agriculture paying better than the growing of fruit. The farmer must have a diversity of crops. Select a good combination of the best paying lines in your locality and push. That's all.

Select your trees carefully. May we help you? Write. Ask questions. Tell us what you would like to do. We may be able to send you a few suggestions that you may find valuable.

Yours respectfully,

The Falls City Nursery.

A. J. A. Spafford, Proprietor.

In this price list, you will find very little in the way of descriptions. The lists of varieties contain only such as are well adapted to the middle west.

Should you not feel sure that you are able to make selections from the list for your locality, write me telling just what you wish to have in the way of fruit, or shade and shelter-belt trees. I am anxious to have you succeed; and, because of my having had the opportunity of observing what is best in the various districts, will be able to send you a list for your approval that I know will be suited to your soil and climatic conditions. By suggesting to you right varieties it is possible to make your planting an entire success.

The reason for my omitting the descriptions from the price list is the fact that they are so misleading. What one would term good or the best in one locality will not do at all in another. What is very hardy in one place is not hardy in the other, so in the attempt one is not giving the information desired.

**WHEN YOU BUY QUALITY NURSERY STOCK YOU
RUN NO RISK**

THE FALLS CITY NURSERY

Falls City, Nebraska.

Send me a map or drawing of your plat of ground that you wish to set to trees, and I will send you a carefully selected list for your approval, when you have returned this with whatever corrections that you may see fit to make I will file your order and send the stock to you just as you may instruct. You will find this far more satisfactory than the old way of selecting from descriptions that are frequently very highly colored.

LOCATION

We are at the geographical center of one of the greatest fruit growing districts in the United States. The fruit from this section has been pronounced the best by men of broad experience, single individuals having grown and shipped from Falls City, Neb., as high as a hundred carloads.

The natural conclusion is: That, where fruit is found yielding so well, it would be an ideal place for the growing of nursery stock, and so it is.

Our railroad facilities at Falls City are such that any part of this section of the Middle West may be reached in a few hours.

We have Missouri river rates. Each of the above facts will be found of advantage to our customers.

APPLES AND CRAB APPLES, No. 1
